Consolidated financial result

During the consolidated fiscal year ended May 31, 2021 under review, the protracted novel coronavirus (COVID-19) pandemic caused great damage to the Japanese economy. Though the economy is on a recovery trend, the outlook remains uncertain due to several factors, including stagnant personal consumption. It is expected that economic activities will normalize with herd immunity achieved through vaccination in the future. In the global economy, the Chinese economy recovered ahead of other regions, and sentiment improved in the United States as well, supported by the vaccination. In the interior industry, which relates to the Company's business, domestic new housing starts were down 4.8% year on year, and the floor area of nonresidential construction starts also decreased by 5.8% year on year. In the automotive industry, automobile production in the Japanese market was down 1.8% year on year. Both production and sales also stagnated in overseas markets.

falling short of those in the previous fiscal year.

In the above-described business environment, the Group is promoting market development of ESG-based products and global management, which the Group has been working on, while implementing measures to prevent the spread of COVID-19, such as improving the working environment by securing the safety and security of employees. In the Interior Fittings Segment, the Company endeavors to increase sales of products processed with antibacterial and antiviral technology called CLEANSE® and other healthconscious and environment-friendly products, including ECOS®, eco-friendly carpet tiles under the horizontal recycling system. In addition, in the space design business, we will strive to expand our business domain from store interior design, which is our area of specialty. In the Automotive Textiles and Traffic Facilities Segment. efforts are being made to develop technologies and increase orders received for non-textile products such as artificial leather and to reduce costs through the optimization of material procurement and the places of production for globally marketed cars in the automotive textiles business. While in the traffic facilities business, the Company manufactures and distributes high-performance fabric materials and endeavors to increase sales of seat cushion materials and safety products for railway vehicles and buses. In both the automotive textiles business and

President Teppei Nagata 永田鉄平

the traffic facilities business, our processing technologies accumulated in the Interior Fitting Segment including antibacterial and antiviral effects are applied to the product development.

In the Functional Materials Segment, the Company established a new sales and distribution base for fabriccoated electric heating products in Vietnam in 2019. We will diversify regional risks and establish an optimal supply system. Furthermore, our focus is placed on the development and sale of products processed with our original complex function processing technology called TRIPLE FRESH® Deo, which provides deodorizing, antibacterial, antiviral and anti-allergen functions. For the entire Group, we are working on reconstructing our core system and raising the accuracy of our consolidated performance management, in order to upgrade our business management structure. We have been working steadily on building a foundation for business growth. Presently, a cross-business project has been established. Gathering the strengths of each business field such as the design capability of the Interior Fittings Segment, the processing technology for fabric materials used in the Automotive Textiles and Traffic Facilities Segment, and high-function technologies including the deodorizing, antibacterial and antiviral capabilities of the Functional Materials Segment, the Company engages in the development of next-generation interior fittings, which will be required for our living spaces in the future.

Under these circumstances, our consolidated financial results for the fiscal year are as follows. Net sales declined 12.9% year on year to ¥79,702 million (U.S.\$724,569 thousand) attributable to lackluster sales of commercial carpet tiles and wall coverings and a drop in domestic and overseas automobile-related sales due to the impact of the global economic slowdown. As to profits, operating income declined 32.6% year on year to ¥1,049 million (U.S.\$9,539 thousand), ordinary income declined 8.5% year on year to ¥1,211 million (U.S.\$11,015 thousand), and income attributable to owners of parent increased 186.4% year on year to ¥409 million (U.S.\$3.723 thousand) due to the impacts of recognition of gain on sales of investment securities, loss on retirement of noncurrent assets and impairment loss as extraordinary income/loss.

Dividend policy

The Company has positioned shareholder return as a key management issue and distributes profits appropriately by taking into account stable dividend payments and business results. Based on this basic dividend policy, the annual dividend for the fiscal year ended May 31, 2021 was ¥35 (U.S.\$0.32) per share, with an interim dividend of ¥15 (U.S.\$0.14) per share and a vear-end dividend of ¥20 (U.S.\$0.18) per share.

In addition, it plans to pay an annual dividend of ¥70 per share (an interim dividend of ¥35 and year-end dividend of ¥35) for the fiscal year ending May 2022.

Annual Cash Dividends Per Share

Note : The figures shown were calculated based on standards after the reverse stock split.

Outlook for the next term

We have newly established "SUMINOE GROUP WAY 2022-2024-2027," our consolidated medium- to longterm management targets which will start in June 2021. Under the ESG-based management that the Group has been striving to implement, we will promote sales expansion of products that meet the needs of society and global management. All employees of the Group will work together to meet these consolidated mediumto long-term management targets.

In the fiscal year ending May 31, 2022, which is the first year of the plan, the domestic and overseas economies which have been subdued by the COVID-19 pandemic, are expected to normalize. We thus forecast higher net

sales and profit compared to the previous fiscal year. However, certain factors in industries related to the business of the Group, namely, the uncertain outlook for new residential and non-residential construction starts in Japan in the interior industry and semiconductor shortages in the automobile industry, may negatively affect our performance.

Considering these circumstances, we plan to post net sales of ¥86,480 million, operating income of ¥1,160 million, ordinary income of ¥1,350 million, and profit attributable to owners of parent of ¥620 million for the fiscal year ending May 31, 2022.

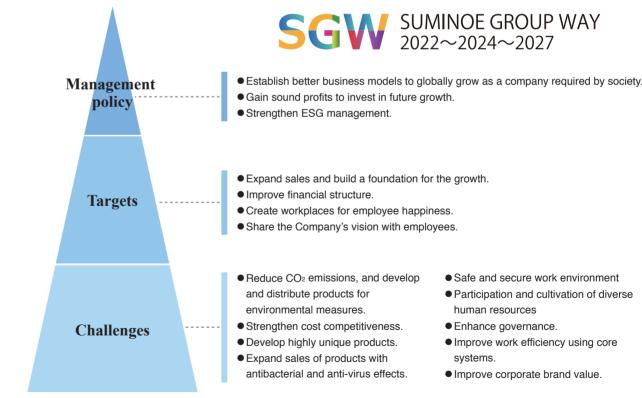

Medium- to Long-term Management Targets

SUMINOE GROUP WAY 2022-2024-2027

The Company formulated "SUMINOE GROUP WAY 2022-2024-2027," new Medium- to Long-term Management Targets starting June 2021. In order to continue to grow into the future, we will combine the strengths of all employees of the Group companies to achieve the targets Plan by increasing sales of products that meet social needs and promoting global management based on the ESG management which the Group has focused on to date.

SUMINOE GROUP WAY POLICY

With a view to our medium- to long-term "ideal corporate image," we have formulated policies up to the fiscal year ending May 2027.

Medium- to Long-term Targets Net sales: 100 billions of yen or more, Operating margin: 5% or more

Note : The planned figures for the fiscal year ending May 2022 are as of the announcement on July 13, 2021

5

- Safe and secure work environment
- Participation and cultivation of diverse
- Improve work efficiency using core

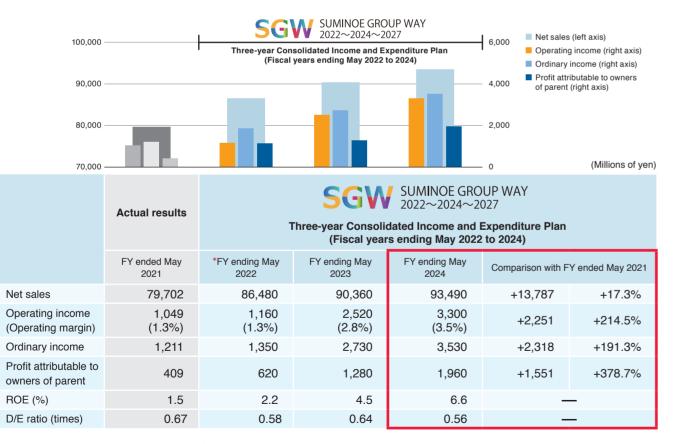

Financial Targets

- · Expand sales and build a foundation for the growth.
- Improve financial structure.

Overview of the Three-year Plan (Fiscal years ending May 2022 to 2024)

With ESG management in mind, the Group will develop and promote the sale of products that contribute to a decarbonized society and products with antibacterial and anti-virus effects in each business segment. The Group will also endeavor to improve productivity and competitiveness, aiming at further efficiency by strengthening the management base and at the same time reorganizing offices through restructuring of core systems.

- Three-year Consolidated Income and Expenditure Plan

- Investments and Capital Policy

- We will aggressively implement capital expenditure and expanding business scale.
- We will endeavor to realize the optimum capital structure.

Creating cash flow
Operating cash flow
Improving D/E ratio
Securitization of assets • Selling securities • Selling land (Nara Factory of Suminoe Techno Co., Ltd.)
Effective use of treasury stock

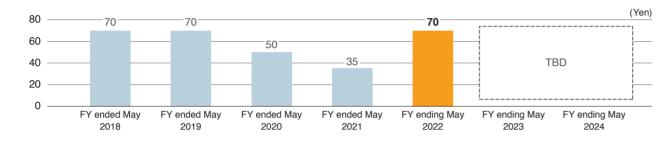

• We will aggressively implement capital expenditure and M&A with the aim of strengthening the existing businesses and the

— Profit Return to Shareholders

With stable dividend payment to shareholders as a precondition, we will appropriately distribute returns, taking into consideration the trend of business performance and future investments for business expansion. The dividend will be paid twice a year as an interim dividend and a year-end dividend.

We will enhance communication with shareholders through proactive IR activities.

Non-financial Targets – Initiatives for ESG

- Create workplaces for employee happiness.
- · Share the Company's vision with employees.

Environment

- Initiatives for Reduction of CO₂ Emissions

We have focused on the initiatives for the reduction of CO₂ emissions through products manufactured by the Group since we developed *SUMITRON*[®] in 1990.

In June 2021, we established the "Visualization Committee on the Reduction of CO₂ Emissions" to further enhance the reduction of CO₂ emissions and the lowering of environmental load.

- - Circulation-type recycling of carpet tiles
 - · Increase the use of recycled fibers, such as SUMITRON®.
 - Increase the use of yarn recycled from PET and recycled resin materials.
- Reduction of CO₂ emissions in the business activities
 - Improve logistics systems and unify the production bases.
- Improve energy efficiency and change fuels used.
- · Working style reforms

 $\ensuremath{\textit{ECOS}}\xspace$, carpet tiles under the horizontal recycling system

Volume of contribution to the reduction of CO₂ emissions over 10 years

- Development of Eco-friendly Products

We will contribute to a decarbonized society by accelerating research and development under the development philosophy of "K (Kenko meaning Health in Japanese), K (Kankyo meaning Environment), Recycle, plus A (Amenity)."

(Examples of eco-friendly products that contribute to the reduction of CO2 emissions)

- ECOS_®, carpet tiles under the horizontal recycling system
 - · Launched in 2011
- Achieved 84% at the maximum, which is the highest level of recycled materials used in the industry, and 43% at the maximum in the reduction rate of CO₂ emissions.
- Approximately 90,000 tons of CO₂ was reduced over the past decade.
- Approximately 220,000 tons of CO₂ are to be reduced over the next decade.

"*ECOS*®": the solution-dyed yarn is applied to the pile yarn for the surface.

Social

We will endeavor to create workplaces for employee happiness.

- Initiatives for employees
- 1. Improve workplaces for more safety and security.
- 2. Diversity and inclusion
- 3. Participation and cultivation of human resources
- 4. Omnidirectional communication

Social contribution activities

- Contribution in cases of disasters
- Support and donation for poverty and starvation

- SUMITRON®
 - Polyester chips recycled from PET bottles are used as material by 50% or more.
 - Useable for a long period of time due to excellent weather- and heat-resistance properties.
 - Solution-dyed yarn is used for reducing environmental load.

Transition to solution-dyed yarn

Traditionally, the piece-dyeing method, which required large amounts of water and electricity as well as dyeing effluent treatment, had been applied to dye pile yarn used for the surface of carpets. We have now shifted to using solution-dyed yarn (pigmented at the spinning stage), which reduces CO₂ emissions, requiring less water and energy and with no effluent problem in the production process.

Governance

We aim to be a company trusted in society by further promoting our initiatives and by complying with laws and regulations and corporate ethics.

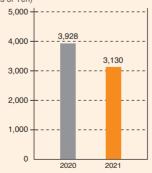

- · Restructure the core systems.
- · Strengthen the managerial decision making by outside directors.
- Promote interactive in-house communication through top management's frequent visits to workplaces.
- · Continue to conduct compliance training.
- · Further disseminate "Corporate ethics hotline."
- Strengthen global risk management.
- BCP action plan

SUMITRON Continuous Fiber Made from Recycled PET bottles

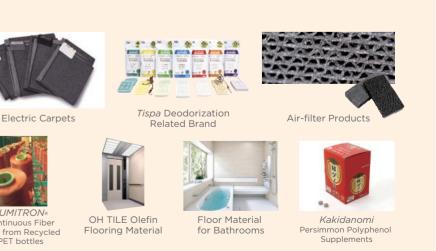

Nishijin Brocade Fabric

At the Vanguard of Lifestyle Creation

Ever since 1891, when its carpets were supplied to the Imperial Diet Building on the occasion of its opening, the Suminoe Textile Group has created comfortable and safe living spaces as a pioneer in the Japanese interiors industry. Currently, our curtains and carpets are primarily marketed by SUMINOE Co., Ltd. and our wallpaper and paper for sliding doors by RUNON CO., LTD. The Suminoe Textile Group is committed to providing environmentally friendly products that feature both excellent design and functionality, and serving diverse customers by offering a wide variety of interior products for public facilities, hotels, schools, hospitals, and office buildings, as well as for general households.

In recent years, we have worked on the production of eco-friendly products, under the theme of

KKR+A, or Kenko (Health), Kankyo (Environment), Recycle and Amenity.

Environmentally Friendly Product at the World's Highest Level

ECOS® is a series of recycled carpet tiles produced using horizontal recycling technology. ECOS®

has achieved a postconsumption recycled material usage rate of 84%. Through our proprietary recycling system, recycled materials are created from old carpet tiles.

SUMINOE Co., Ltd.

Rugs and Mats

Curtains

Business Overview for the Fiscal Year ended May 31, 2021

While sales of household carpets for online and retail stores were robust, sales of commercial carpet tiles and wall coverings were sluggish. As a result, net sales declined 6.8% year on year to ¥31,024 million (U.S.\$282,045 thousand), and operating income increased 22.8% year on year to ¥579 million (U.S.\$5,271 thousand) due to the impacts of a reduction in selling, general and administrative expenses and household carpet sales.

Regarding commercial carpets, sales of roll carpets increased thanks to orders for large-scale projects. However, sales of carpet tiles, those for export in particular, remained significantly weak due to the impact of lockdowns on economic activities.

Consequently, net sales of commercial carpets as a whole declined 2.6% year on year.

Net sales of household carpets increased by 9.0% year on year reflecting robust sales for online under the stayat-home restriction, and strong sales mainly at DIY stores. Regarding curtains, while sales of mode S_® Vol. 9 and U

RUNON CO., LTD.

Wallpaper

Tango Textile Co., Ltd.

Nishijin Brocade Fabric

Plush Hand-woven Curtains

Hand-woven Carpet and Hooked Rugs

Life® Vol. 9 for general households were subdued, sales of Face for medical, welfare, and educational institutions recovered due to the resumption of new deliveries and replacement work that had been postponed to prevent the spread of COVID-19. Accordingly, net sales of curtains as a whole declined 3.2% year on year.

Net sales of wall coverings were down 11.7% year on year owing to the decrease in sales of wallpaper attributable to the decline in demand for new construction and refurbishments for houses, stores, hospitals, and hotels due to the COVID-19 pandemic.

Prospects for the next fiscal year

New construction of large properties, including hotels and commercial facilities, is expected to remain sluggish. We will strive to expand the sales of environmentallyfriendly products and antibacterial and antiviral products while working to raise awareness of the SUMINOE brand. We will also focus on online sales, which have

performed well in the current fiscal year.

Our Expertise in Proposing Optimal Solutions as a Total Supplier

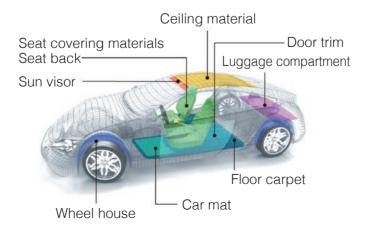

In 1931, Suminoe Textile supplied carpets and seat covering materials for automobiles assembled and manufactured in Japan for Ford Motor Company and General Motors. After World War II, the production of domestic automobiles increased, with our products adopted in these Japanese-made cars one after another.

At present, Suminoe Textile supplies its products to all Japanese automobile manufacturers. The greatest feature of our Company is that we can supply a total line of automotive textiles, from floors to ceilings, including headliners, seat covering materials, car mats, and floor carpets. Outside Japan, the Suminoe Textile Group has now

expanded its overseas presence by setting up 12

manufacturing and sales sites in six countries (the

United States, Mexico, China, Thailand, Indonesia, and India), aiming at the creation of a globally optimized supply system.

Confidence Based on Our Experience as a Pioneer

In 1896, we succeeded in producing hand-woven moguette as a seat covering for the first time in Japan. This domestic moquette was adopted by Japan National Railways (now JR) for its seat coverings in 1899. Since then, we have supplied our products to JR, private railways and publicly operated transportation services, maintaining the top market share for more than a century. Currently, Suminoe Textile offers total proposals for seat coverings, curtains, wall materials, flooring materials and other interior materials for public transportation systems, such as Shinkansen bullet trains and other trains, buses, ships, and aircraft. We also deliver environmentally friendly products, including SUMICUBE® seat cushion material,

which excels in terms of both safety and environmental performance.

> SUMICUBE® Seat Cusion Material East Japan Railway Company: E235 series

Business Overview for the Fiscal Year ended May 31, 2021

Net sales were down 16.6% year on year to ¥45,102 million (U.S.\$410,019 thousand) and operating income declined 20.7% year on year to ¥2,102 million (U.S.\$19,114 thousand) on the back of decline of global car production by Japanese automakers and a sluggish demand for interior materials for railway vehicles and buses. In the automotive textiles business, a decline in car production by Japanese automakers was observed due to sluggish economic activity attributable to the COVID-19 pandemic. Domestic automobile production recovered in September 2020 to the same level as September of the previous year and the recovery trend continued thereafter. However, domestic sales declined 6.0% year on year, attributable to the impact of multiple factors, such as semiconductor shortages. Regarding overseas markets, though China continued to demonstrate a steady recovery, recovery from sluggish production resulting from lockdowns was slow in Thailand, Indonesia, etc. Additionally, production temporarily declined due to the impact of cold waves

Central Japan Railway Company, West Japan Railway Company : Sinkansen N700 series

and semiconductor shortages in North America. Overseas sales therefore declined 21.1% year on year. In the traffic facilities business, demand for interior fittings for railway vehicles dropped due to fewer passengers on public transportation attributable to the promotion of telework. Furthermore, new bus production volume plunged due to significantly diminished domestic travel and inbound foreign tourists. As a result, net sales for the traffic facilities business as a whole fell below the level of the previous year.

Prospects for the next fiscal year

In the automobile industry, the number of automobiles produced is expected to recover, and their sales are expected to increase year on year both in Japan and overseas. Although the sales of train- and bus-related products are expected to remain challenging, we will work on the development of antiviral processed interior materials and environmentally-friendly seat coverings.

In Pursuit of Endless Business Possibilities

Transcending the boundaries of our traditional business segments, such as interior fittings and automotive textiles and traffic facilities, we have embarked on business targeting other fields and industries. Suminoe Textile has offered products that incorporate the unique technologies we have accumulated, such as TRIPLE FRESH® deodorizing filters and olefin bathroom flooring. In addition, the Company offers new value in the field of functional materials (SUMINOE BIOTECH®) based on biotechnology, in keeping with the theme of KKR+A, or Kenko (Health), Kankyo (Environment), Recycle and Amenity.

Business Overview for the Fiscal Year ended May 31, 2021

While sales of deodorant filters for air purifiers and floor materials for bathrooms grew steadily, new orders received in the current fiscal period for electric carpets, one of our core products, plummeted due to the warm winter in the previous fiscal period. Net sales declined 20.3% year on year to ¥3,130 million (U.S.\$28,456 thousand), and operating loss was ¥(87) million (U.S.\$(792) thousand, operating income of ¥79 million in the previous fiscal year), reflecting decreases in sales of roofing materials, civil engineering materials, interior materials for airplanes, and SUMITRON®, a continuous polyester fiber yarn due to the impact of the COVID19 pandemic, as well as sluggish sales of other products, including mats for school children.

Prospects for the next fiscal year

We will proceed with the reorganization of factories in China and Vietnam, which are production bases for electric carpets, to build an optimal supply system. We will work to secure orders in the existing businesses and to promote the development and sales of new functional processed products that meet market needs.

Suminoe Textile Co., Ltd. and Subsidiaries As of and for the Year Ended May 31, 2021

1. BASIS OF PRESENTATION OF CONSOLIDATED FINANCIAL STATEMENTS

The accompanying consolidated financial statements of Suminoe Textile Co., Ltd. (the "Company") and its consolidated subsidiaries have been prepared in accordance with the provisions set forth in the Japanese Financial Instruments and Exchange Act and its related accounting regulations and in accordance with accounting principles generally accepted in Japan ("Japanese GAAP"), which are different in certain respects as to the application and disclosure requirements of International Financial Reporting Standards ("IFRS"). In preparing these consolidated financial statements, certain reclassifications and rearrangements have been made to the consolidated financial statements issued domestically in order to present them in a form which is more familiar to readers outside Japan. In addition, certain reclassifications have been made in the 2020 consolidated financial statements to conform to the classifications used in 2021.

The consolidated financial statements are stated in Japanese yen, the currency of the country in which the Company is incorporated and operates. The translation of Japanese yen amounts into U.S. dollar amounts are included solely for the convenience of readers outside Japan and have been made at the rate of ¥110 to \$1, the approximate rate of exchange at May 31, 2021. Such translation should not be construed as representations that the Japanese yen amounts could be converted into U.S. dollars at that or any other rate.

Each amount of the accompanying consolidated financial statements is rounded down to the nearest one million yen or rounded off to the nearest one thousand U.S. dollar, unless otherwise indicated. Consequently, the totals shown in the accompanying consolidated financial statements do not necessarily agree with the sums of the individual amounts.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a. Consolidation - The accompanying consolidated financial statements as of and for the year ended May 31, 2021 include the accounts of the Company and all of its wholly-owned and majority-owned subsidiaries (collectively, the "Group").

Under the control and influence concept, those companies in which the Company, directly or indirectly, is able to exercise control over operations are fully consolidated, and those companies over which the Company has the ability to exercise significant influence are accounted for by the equity method.

Investments in two associated companies have been accounted for using the equity method.

The excess of the cost of acquisition over the fair value of the net assets of an acquired subsidiary at the date of acquisition is amortized over a period not exceeding 20 years.

All significant intercompany balances and transactions have been eliminated in consolidation. All material unrealized profit included in assets resulting from transactions within the Group is also eliminated. Among consolidated subsidiaries, certain domestic and foreign subsidiaries have different fiscal year-ends from the Company's fiscal year-end, May 31. Those companies which fiscal year-end is March 31, the financial statements of these subsidiaries as of and for the year ended March 31 were used in preparing the accompanying consolidated financial statements. Those companies which fiscal yearend is September 30 or December 31, the financial statements of these subsidiaries as of and for the period ended March 31 or April 30, as available, were used in preparing the accompanying consolidated financial statements. All material transactions which occurred during the periods from their respective fiscal year-ends to May 31 have been accounted for in the consolidation process.

b. Unification of Accounting Policies Applied to Foreign Subsidiaries for the Consolidated Financial Statements - Under Accounting Standards Board of Japan ("ASBJ") Practical Issues Task Force No. 18. "Practical Solution on Unification of Accounting Policies Applied to Foreign Subsidiaries for the Consolidated Financial Statements", the accounting policies and procedures applied to a parent company and its subsidiaries for similar transactions and events under similar circumstances should in principle be unified for the preparation of the consolidated financial statements. However, financial statements prepared by foreign subsidiaries in accordance with either IFRS or generally accepted accounting principles in the United States of America ("U.S. GAAP") tentatively may be used for the consolidation process, except for the following items which should be adjusted in the consolidation process so that net income is accounted for in accordance with Japanese GAAP, unless they are not material: (1) amortization of goodwill; (2) scheduled amortization of actuarial gain or loss of pensions that has been recorded in equity through other comprehensive income: (3) expensing capitalized development costs of research and development ("R&D"); and (4) cancellation of the fair value model of accounting for property, plant and equipment and investment properties and incorporation of cost model of accounting.

c. Unification of Accounting Policies Applied to Foreign Associated Companies for Using the Equity Method - ASBJ Statement No. 16, "Accounting Standard for Equity Method of Accounting for Investments," requires adjustments to be made to conform the associates' accounting policies for similar transactions and events under similar circumstances to those of the parent company when the associate's financial statements are used in applying the equity method, unless it is impracticable to determine such adjustments. In addition, financial statements prepared by foreign associated companies in accordance with either IFRS or U.S. GAAP tentatively may be used in applying the equity method if the following items are adjusted so that net income is accounted for in accordance with Japanese GAAP, unless they are not material: (1) amortization of goodwill; (2) scheduled amortization of actuarial gain or loss of pensions that has been recorded in equity through other comprehensive income; (3) expensing capitalized development costs of R&D; and (4) cancellation of the fair value model of accounting for property, plant and equipment and investment properties and incorporation of the cost model of accounting.

d. Business Combinations - Business combinations are accounted for using the purchase method. Acquisitionrelated costs, such as advisory fees or professional fees, are accounted for as expenses in the periods in which the costs are incurred. If the initial accounting for a business combination is incomplete by the end of the reporting period in which the business combination occurs, an acquirer shall report in its financial statements provisional amounts for the items for which the accounting is incomplete. During the measurement period, which shall not exceed one year from the acquisition, the acquirer shall retrospectively adjust the provisional amounts recognized at the acquisition date to reflect new information obtained about facts and circumstances that existed as of the acquisition date and that would have affected the measurement of the amounts recognized as of that date. Such adjustments shall be recognized as if the accounting for the business combination had been completed at the acquisition date. The acquirer recognizes any bargain purchase gain in profit or loss immediately on the acquisition date after reassessing and confirming that all of the assets acquired and all of the liabilities assumed have been identified after a review of the procedures used in the purchase price allocation. A parent's ownership interest in a subsidiary might change if the parent purchases or sells ownership interests in its subsidiary. The carrying amount of non-controlling interest is adjusted to reflect the change in the parent's ownership interest in its subsidiary while the parent retains its controlling interest in its subsidiary. Any difference between the fair value of the consideration received or paid and the amount by which the non-controlling interest is adjusted is accounted for as capital surplus as long as the parent retains control over its subsidiary.

3. SEGMENT INFORMATION

Under ASBJ Statement No. 17, "Accounting Standard for Segment Information Disclosures." and ASBJ Guidance No. 20. "Guidance on Accounting Standard for Segment Information Disclosures", an entity is required to report financial and descriptive information about its reportable segments. Reportable segments are operating segments or aggregations of operating segments that meet specified criteria. Operating segments are components of an entity about which separate financial information is available and such information is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance. Generally, segment information is required to be reported on the same basis as is used internally for evaluating operating segment performance and deciding how to allocate resources to operating segments.

(1) Description of Reportable Segments

The Group's reportable segments are components for which separate financial information is available and whose operating results are reviewed regularly by the Board of Directors in order to determine allocation of resources and assess segment performance. The Group is organized by business operating units and subsidiaries, which are separated based on the products and services they provide. Each of these units and subsidiaries plan comprehensive strategies for business and perform business activities. Therefore, based on these business operating units and also taking into account the types of products and the similarities in markets, the reportable segments of the Group are divided into three segments: "Interior Fittings", "Automotive Textiles and Traffic Facilities", and "Functional Materials". The Interior Fittings segment includes manufacturing and selling carpets, curtains, wallpaper and other flooring materials. The Automotive Textiles and Traffic Facilities segment includes manufacturing and selling interior materials for automobiles, trains, buses, ships, aircraft and other conveyances. The Functional Materials segment includes manufacturing and selling electric heated carpets and related products, such as deodorizers and processing of silicon wafers for solar cells.

(2) Methods of Measurement for the Amounts of Sales, Profit, Assets and Other Items for Each Reportable Segment

The accounting policies of the segments are substantially the same as those used in preparing the accompanying consolidated financial statements. The profits of reportable segments correspond to operating income. The intersegment sales or transfers are based on actual market prices.

Note 1

Other represents segments that are not included in any other reportable segments, such as physical property and performance inspection.

Note 2

Adjustments are as follows:

- 1) Adjustment of ¥(1,619) million recorded for segment income for the year ended May 31, 2021 includes elimination of intersegment transactions of ¥26 million and corporate expenses of ¥(1,645) million that are not allocated to relevant reportable segments. Unallocated corporate expenses mainly consist of expenses for the administrative and R&D divisions that do not belong to any reportable segment.
- Adjustment of ¥20,459 million recorded for segment assets for the year ended May 31, 2021 includes elimination of intersegment transactions of ¥(74) million and corporate assets of ¥20,534 million that are not allocated to relevant reportable segments. Unallocated corporate assets mainly consist of investment of surplus funds (cash and deposits), long-term investment (investment securities), and assets related to the administrative division that do not belong to any reportable segment.

Note 3

Segment income is adjusted with operating income in the accompanying consolidated statements of income.

Note 4

Other represents segments that are not included in any other reportable segments, such as the physical property and performance inspection.

Note 5

- Adjustments are as follows: 1) Adjustment of ¥(1,690) million recorded for segment income for the year ended May 31, 2020 includes elimination of intersegment transactions of ± 28 million and corporate expenses of $\pm (1,718)$ million that are not allocated to relevant reportable segments. Unallocated corporate expenses mainly consist of expenses for the administrative and R&D divisions that do not belong to any reportable segment.
- 2) Adjustment of ¥21,954 million recorded for segment assets for the year ended May 31, 2020 includes elimination of intersegment transactions of ¥(251) million and corporate assets of ¥22,205 million that are not allocated to relevant reportable segments. Unallocated corporate assets mainly consist of investment of surplus funds (cash and deposits), long-term investment (investment securities), and assets related to the administrative division that do not belong to any reportable segment.

Note 6

Segment income is adjusted with operating income in the accompanying consolidated statements of income.

Note 7

Other represents segments that are not included in any other reportable segments, such as the physical property and performance inspection.

Note 8

- Adjustments are as follows: 1) Adjustment of \$(14,723) thousand recorded for segment income for the year ended May 31, 2021 includes elimination of intersegment transactions of \$240 thousand and corporate expenses of \$(14,963) thousand that are not allocated to relevant reportable segments. Unallocated corporate expenses mainly consist of expenses for the administrative and R&D divisions that do not belong to any
- reportable segment. 2) Adjustment of \$185,996 thousand recorded for segment assets includes elimination of intersegment transactions of \$(679) thousand and corporate assets of \$186,675 thousand that are not allocated to relevant reportable segments. Unallocated corporate assets mainly consist of investment of surplus funds (cash and deposits), long-term investment (investment securities), and assets related to the administrative division that do not belong to any reportable segment.

4. PER SHARE INFORMATION

	Millions of Yen	Thousands of Shares	Yen	U.S. Dollars
For the year ended May 31, 2021	Profit Attributable to Owners of the Parent	Weighted-Average Shares	EP	S
Basic EPS – Profit attributable to common shareholders	409	6,315	64.84	0.59
	Millions of Yen	Thousands of Shares	Yen	
For the year ended May 31, 2020	Profit Attributable to Owners of the Parent	Weighted-Average Shares	EPS	
Basic EPS – Profit attributable to common shareholders	142	6,535	21.88	

Note: Diluted earnings per share is not presented as there were no dilutive securities for the year ended May 31, 2021.

Treasury shares held by the Company are not included in the number of shares of common stock and the weighted-average number of shares used for computation of the basic EPS and net assets per share. The number of treasury shares excluded from the calculation of basic EPS were 1,366 thousand and 1,147 thousand for the years ended May 31, 2021 and 2020, respectively. The number of such shares for the calculation of net assets per share were 1,363 thousand and 1,373 thousand as of May 31, 2021 and 2020, respectively.

Net assets per share as of May 31, 2021 and 2020 were as follows:

	Millions of Yen
As of May 31, 2021	Net Assets Attributable to Owners of the Parent
Net assets per share	28,044
	Millions of Yen
As of May 31, 2020	Net Assets Attributable to Owners of the Parent
Net assets per share	27,998

The basis of computing basic earnings per share ("EPS") for the years ended May 31, 2021 and 2020 were as follows:

Thousands of Shares	Yen	U.S. Dollars
Common Shares	Net Assets	s per Share
6,318	4,438.67	40.35
Thousands of Shares	Yen	
Common Shares	Net Assets per Share	
6,308	4,438.11
