#### 1. Qualitative information for the third quarter of the fiscal year under review

#### (1) Explanation of business results

During the first nine months of the consolidated fiscal year ending May 31, 2023 the Japanese economy maintained a moderate recovery trend supported by a move toward the normalization of social and economic activities for the new normal on the back of the easing of behavioral restrictions against COVID-19. On the other hand, prospects remain unpredictable with raw material prices and energy costs remaining at high levels and the short supply of components continuing due to geopolitical risks such as the Ukraine crisis, and concerns over drastic fluctuations in foreign exchange rates arising from worldwide financial tightening together with economic downside risks.

In the interior industry, which relates to the Company's business, the domestic new housing starts and the floor area of nonresidential construction starts remained almost at the same level as in the previous fiscal year. Moreover, automobile production in the Japanese market was up 11.6% year on year. Both production and sales in overseas markets increased and exceeded the results for the same period of the previous year.

The Group has been promoting its medium- to long-term management targets, "SUMINOE GROUP WAY 2022-2024-2027," which is now in its second year.

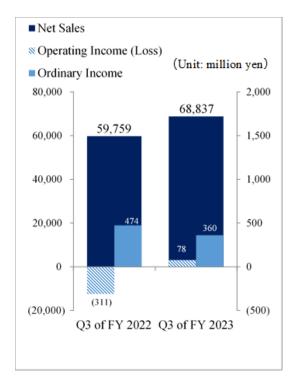

In the Interior Fitting Segment, the Company focuses on increasing sales of environment-friendly and functional products, such as *ECOS®*, eco-friendly carpet tiles under the horizontal recycling system. In 2022, the Company won the FY2022 Resources Recirculation Technologies and Systems Award, conferred by the Director-General of the Industrial Science and Technology Policy and Environment Bureau, Ministry of Economy, Trade and Industry, in recognition of its social contribution through the reduction of waste realized through a recycling system of construction materials. Furthermore, the Company is striving to expand the scope of its Space Design Business, which involves designing an entire space, with the expectation of generating synergy among Group companies. We will reinforce our competitive edge by flexibly satisfying customer needs in the entire Interior Fitting Segment while working to raise awareness of the SUMINOE brand.

In the Automotive Textiles and Traffic Facilities Segment, we focus on technology development and increasing orders received for non-textile products such as artificial leather in the automotive textiles business, while also striving to provide high value-added products. In addition, due to soaring raw material prices, we are continuing to work on cost reductions by optimizing raw material procurement and production bases for global models. In the traffic facilities business, the Company is striving to manufacture and distribute high-performance fabric materials while making efforts to increase sales of seat cushion materials and safety products for railways and buses. We are prepared to quickly respond to the recovery of demand on the back of the increase in number of passengers of railway and bus operators.

In the Functional Materials Segment, the Company completed in the previous fiscal year the consolidation of plants in China and Vietnam, which were the production bases for fabric-coated heating products. Starting from the current fiscal year, the plant in Vietnam has become the main plant for the production of fabric-coated heating products. By diversifying regional risks and building an optimal supply system, we will promote responses to the uncertain external environment. Furthermore, by strengthening collaboration with the Technology and Production Headquarters as the development divisions, the Company works to increase the value of its businesses and products and enhance its development sales capability, focusing on securing order receipts in existing businesses and promoting the development and sales of new functional processed products that meet market needs, as well as the application of smart textile technology.

We will celebrate the 140th anniversary of the Company's foundation in 2023. Taking this opportunity, we are working on the Company's branding in pursuit of improvement in corporate brand value. We will also discuss how we should contribute to society through not only profits but also our business, and we rebuild the SUMINOE GROUP's unique manufacturing toward the future.

Under these circumstances, our consolidated quarterly results for the third quarter of this fiscal year are as follows.

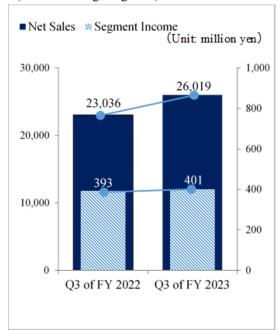

Net sales increased to 68,837 million yen, a year-on-year increase of 15.2%, and operating income was 78 million yen (operating loss of 311 million yen in the same period of the previous fiscal year). These results were attributable to an increase in domestic automobile production by Japanese car manufacturers in addition to the favorable impact of foreign exchange rates in the Automotive Textiles and Traffic Facilities Segment, and also a large order received for commercial carpets by the Interior Fittings Segment. Ordinary income fell by 24.1% year on year to 360 million yen, due to the absence of subsidy income received in the same period of the previous fiscal year after the finalization of loan repayment waivers under "Paycheck Protection Program" in the United States. Furthermore, extraordinary loss includes an impairment loss on property, plant and equipment due to a transfer of non-current assets. As a result, loss attributable to owners of parent was 680 million yen (loss attributable to owners of parent of 338 million yen in the same period of the previous fiscal year).

The performance by segment is as described below.

	Net s	sales	Segment income (loss)		
Segments	Amount (Million yen)	YY Change (%)	Amount (Million yen)	YY Change (%)	
Interior Fittings	26,019	+12.9	401	+2.1	
Automotive Textiles and Traffic Facilities	39,530	+18.2	1,038	+53.6	
Functional Materials	3,003	(1.9)	146	_	
Other	283	+24.5	45	+53.2	
Total	68,837	+15.2	1,632	+55.7	
Adjustment	-	_	(1,554)	_	
Consolidated	68,837	+15.2	78	_	

#### (Interior Fittings Segment)

Net sales increased by 12.9% year on year to 26,019 million yen, and segment income was increased by 2.1% year on year to 401 million yen, reflecting a large order received for commercial carpets, steady growth in curtain sales and partly due to the effect of price revisions for wall coverings.

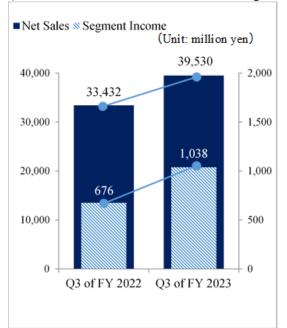

In commercial carpets, *ECOS®*, eco-friendly carpet tiles under the horizontal recycling system, were adopted in a large-sized office building property. Consequently, net sales of commercial carpets as a whole grew by 16.7% year on year.

Sales of household carpets were down 13.8% year on year due to a significant reactionary fall in demand from the elevated levels of stay-at-home demand during the COVID-19 pandemic.

In curtains, sales of *mode S Curtain Vol. 10* for general households, which was launched in July 2022, showed steady growth and *U Life Curtain Vol. 10* also recorded strong sales. As a result, net sales of curtains as a whole were up 3.9% year on year.

Net sales of wall coverings increased by 9.8% year on year, reflecting price revisions to cover soaring raw material prices and robust sales of a catalogue of fusuma paper, *Keisho Vol. 32*, which was launched in February 2023.

In the Space Design Business, net sales in CPO Co., Ltd. and PRETERIOR-TEXTILE Inc., which became a consolidated subsidiary in January 2022, contributed to the results. (Automotive Textiles and Traffic Facilities Segment)

Together with robust sales of domestic automotive-related sales, sales of overseas automotive-related products also increased, mainly due to the favorable impact of foreign exchange rates. As a result, net sales in the Automotive Textiles and Traffic Facilities Segment as a whole grew by 18.2% year on year to 39,530 million yen. Segment income increased by 53.6% year on year to 1,038 million yen, reflecting strong growth in Southeast Asia and improved profit in North and Central America despite sharp increases in raw material prices, energy costs and distribution costs in addition to a decrease in sales at our business bases in China.

In the automotive textiles business, domestic production increased due to the easing of the shortage of semiconductors and other components. As a result, domestic sales increased by 9.5% year on year. Sales in the overseas market were negatively affected by the change in the status of behavioral restrictions against COVID-19 at our business sites in China and also by the production of new cars for which orders were received. Meanwhile, both the effect of foreign exchange and robust sales of automobiles in Southeast Asia due to recovery from the COVID-19 pandemic contributed to an increase in net sales outside Japan by 25.0% year on year.

In the traffic facilities business, the number of railway and bus passengers has a tendency to increase on the back of the easing of behavior restrictions against COVID-19. Sales of products for railway vehicles increased over the year on year because refurbishing works have shown a recovery trend. Moreover, demand for our interior products for buses was on a recovery trend. As a result, net sales in the traffic facilities business as a whole exceeded the results for the same period of the previous fiscal year.

(Functional Materials Segment) ■ Net Sales Segment Income (Loss) (Unit: million yen) 4,000 400 3,062 3,003 3,000 300 2,000 200 146 1,000 100 0 (50)(1,000)(100)Q3 of FY 2022 Q3 of FY 2023

Sales of fabric-coated heating products such as electric carpets, one of our core products, remained almost at the same level as in the same period of the previous fiscal year, reflecting the effect of price revisions to cover higher raw material prices despite a decrease in new orders for delivery in 2022. Orders received for floor materials for bathrooms grew steadily, and filters for refrigerators among deodorizing and filter-related products also showed brisk sales on the back of new orders received. On the other hand, deodorizing filters for air cleaners experienced sluggish sales due to a negative repercussion of demand during the COVID-19 pandemic. As a consequence, net sales in the Functional Materials Segment as a whole decreased by 1.9% year on year to 3,003 million yen. As to profits, segment income was 146 million yen (segment loss of 50 million yen in the same period of the previous year) reflecting the completion of the consolidation of plants in China and Vietnam in the previous fiscal year.

#### (2) Explanation of financial position

Total assets at the end of the third consolidated accounting quarter under review amounted to 88,669 million yen, an increase of 3,868 million yen from the end of the previous consolidated fiscal year, due to an increase in trade receivables.

Liabilities grew to 55,265 million yen, an increase of 3,913 million yen, due to an increase in trade payable and loans payable.

Net assets shrank to 33,404 million yen, a decrease of 44 million yen, due to a decrease in retained earnings despite an increase in valuation difference on available-for-sale securities.

#### (3) Explanation of future forecast information including forecast of consolidated business results

Based on the business performance as of today, we have revised the full-year forecast announced on July 15, 2022 for the consolidated fiscal year ending May 2023. For details, please refer to "Notice on the Revisions to the Business Forecast and Dividend Forecast" which we have announced today.
